PROTECT YOUR
BUILDING
WITH US

**Providing Fire Alarm Monitoring
and FENZ Direct Connections
throughout New Zealand
since 2005**

We offer
Solutions

Many commercial buildings in New Zealand are required to have their fire alarm systems directly connected to Fire and Emergency New Zealand (FENZ) for the buildings warrant of fitness.

Automatic Fire Alarm Monitoring (AFAM) manufactures equipment, and operates a dedicated monitoring network throughout New Zealand, that connects them.

Fire Alarm
Monitoring

AFAM monitors your buildings fire alarm system and automatically notifies you, your service agent, and FENZ if applicable of any faults, events or required maintenance.

FENZ Direct
Connection

AFAM directly connects your buildings Fire Alarm System to FENZ to meet your building WOF requirements. When a fire occurs FENZ are automatically notified keeping the building protected.

Service Agent
Notifications

AFAM notifies your fire alarm service agent about faults, fires and events as they occur so they can maintain your system and keep your building protected.

Enhanced
Information

AFAM's advanced system provides rich technical information about the fire alarm system. This allows your service agent to better maintain your alarm, saving you money.

AFAM are a passionate team dedicated to providing fire alarm monitoring for commercial buildings throughout New Zealand.

When installed, our equipment constantly monitors the fire alarm system and in the event of a fire, fault, or maintenance event, automatically notifies the fire service and the buildings fire alarm service agent.
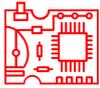

No Long Term Contract Required

AFAM provides an excellent, cost effective, service so unlike our competitors we don't see the need to lock you into a long term contract.

Flexible Purchase & Invoice Options

AFAM's Monitoring equipment can be purchased directly or provided as part of the service. AFAM support direct invoicing or invoicing on behalf.

In Panel & Small Form Factor CTU

AFAM have solutions for all fire alarm panels. Our equipment can be installed either next to the panel, and in some cases inside the panel, reducing install time and cost.

Streamlined Connection Process

AFAM can get your system connected quickly. We aim to ship equipment within 24 hours of order and will support you through the connection process.

Multiple Access Options For Events & Reports

AFAM's monitoring system includes a customer portal, mobile website, automated reporting, and notifications via email and SMS. These keep you informed on your systems performance.
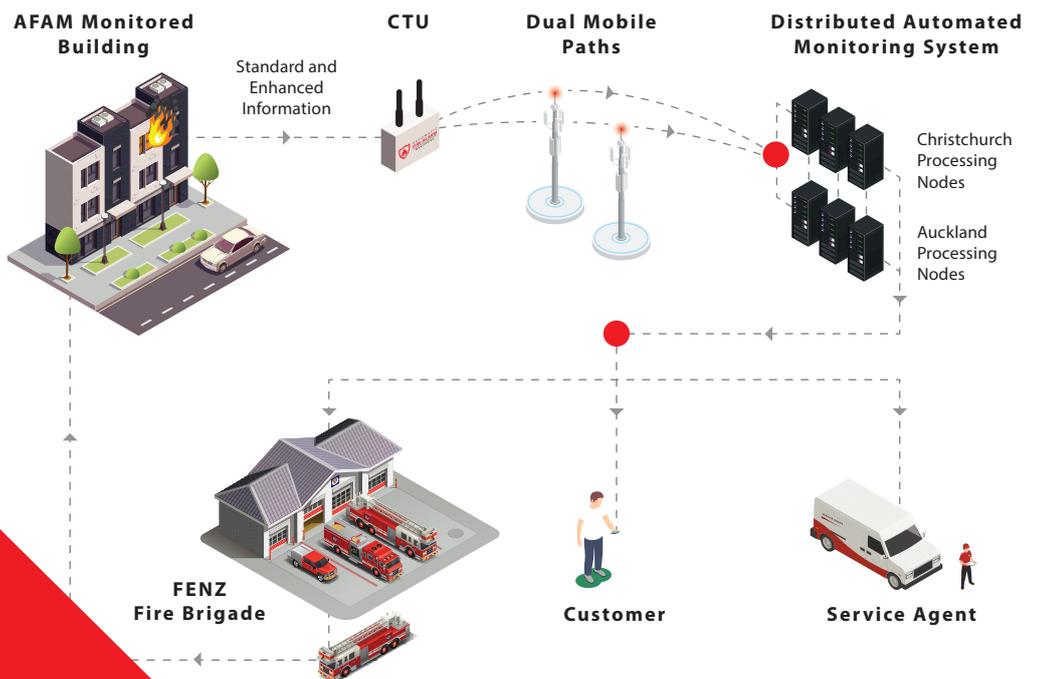

Enhanced Fire Panel Information

AFAM's advanced equipment provides rich technical information about the fire alarm system and its performance. This allows your service agent to better maintain your alarm.

Additional Device Monitoring

AFAM's CTU has a number of additional inputs that can be used to monitor other systems such as pumps, fans, freezers, and other equipment.
